

# Advanced Tactical Operations

## MEDICAL SPECIALIST (ATOMS)

Tri-Med Tactical takes great pride in producing the most scientifically, statistically, clinically, and tactically-sound medicine available today using concepts from Tactical Emergency Casualty Care (TECC) and Tactical Combat Casualty Care (TCCC). With over 200 years of combined public service and military experience, we ensure students receive the most realistic and up-to-date training available.

This course exceeds the National TEMS Initiative curriculum and is Recognized Educational Content by the Committee for Tactical Emergency Casualty Care. **This is an International Board of Specialty Certifications (IBSC)-approved course** for candidates that are looking for quality training to compliment the certification requirements.
